

INFECTIOUS DISEASE- AN UPDATE ON SYPHILIS AND TB

**Tuesday, 24
September 2019**

6.00-8.30pm
Rydges South Park
Cnr South & West Tce, Adelaide

No cost to attend
Dinner Provided

Learning outcomes:

- Describe the diagnosis, treatment and management options for Tuberculosis particularly in at risk populations
- Identify the diagnosis and treatment protocols for all four stages of the Syphilis infection
- Discuss the current Syphilis epidemic in Indigenous populations and what practical strategies can be implemented in primary care to ensure culturally safe disease management
- Outline the referral processes for Tuberculosis and Syphilis based on the severity using the Health Pathway South Australia as a guide

Presented by
