# CARDIOLOGY UPDATE

## Learning outcomes:

- Discuss what first line medications should be prescribed in Heart Failure and how best to introduce them
- Describe indications for device therapy in Heart Failure and the supporting information general practitioners can provide to their patients to ensure a team-based management approach to patient care
- Discuss how familial genetics in Heart Failure can assist in patient care and how to discuss potential screening with families of patients with cardiomyopathy

Approved for 4 category 2 points with RACGP, activity# 166962. 2 core ACRRM points pending

## Presented by

Dr James Gunton  
*Cardiologist- Flinders Cardiology*

A/Prof Anand Ganesan  
*Cardiologist- Flinders Cardiology*

Dr Kathryn Waddell-Smith  
*Cardiologist- Flinders Cardiology*
