Itches and Stitches

A GP Refresher on Dermatology and Skin Cancer Excision

The program will begin by covering common dermatological conditions including Psoriasis, Acne, Eczema, Vulval Dermatitis & Paediatric Conditions. Followed by an afternoon session of theory plus practical, hands on training of skin cancer excision and suturing using pork belly. The practical will be supervised by a small team of plastic surgeons.

Learning Outcomes

- Discuss the specific criteria for the diagnosis of common skin conditions including acne, rosacea, dermatitis, eczema and psoriasis
- Describe the recommended treatment and management of common skin conditions
- Assess and excise common skin cancers within General Practice
- Describe appropriate referral pathways to specialist care for a patient with reoccurring skin cancer to ensure patient safety
